**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamarei (6,093,425) or Kamarei (6,030,650).

In regard to claim 1, both Kamarei ('425) and Kamarei ('650) disclose a carbonated beverage including sugar, calcium, vitamin D3, magnesium, vitamin C and beta carotene. See in this regard col. 5, para.1 and col. 5, para.2, respectively, wherein the resulting product is a carbonated soda. It is noted that claim 1 recites "by reducing sugar". This phrase is otherwise not clarified; that is reducing in regard to what standard? The claim therefore is readable on just sugar. In regard to claim 3, which recites that the flavor "can be" mint, this phrase does not positively recite mint is included in the composition. This phrase is being construed in the same manner as the word "optionally"; that is, it is not a positive recitation. Similarly, the recitation in claim 4 that the sugar can be aspartame is also not seen to be a positive recitation. A positive recitation would be wherein the composition includes or comprises aspartame. In any case, both Kamarei references disclose the use of aspartame.

If applicant chooses to continue prosecution of this application by filing a response, it is noted that because claim 1 recites calcium, vitamin D3, magnesium, vitamin C, carrot juice or beta carotene, claim 1 could be read that the composition

Art Unit: 1761

could contain the ingredients, all in the alternative. It would appear that what was intended was to recite ... comprising calcium...and either carrot juice or beta carotene.

The remainder of the references cited on the PTO892 forms are cited as pertinent art to show the art is replete with nutritionally fortified beverages, both carbonated and non-carbonated.
